

Biography

Written by Chang, Sung Won

I hope to have most beautiful hands in the world.

There is a story about a lady with rough hands. A prince wanted to marry a lady with beautiful hands. This has been spread widely all over the world and the lady's father made his retainers take care of his daughter's hands to marry his daughter off to the prince. One day the lady found a horse in pain, getting a splinter in his leg. In pity of his pain, she pulled out a thorn from the leg. But she found her hands were scratched and bleed. At last, at the day when the prince choose one lady as his wife, princess, who has been chosen one out of many ladies? She was the person who treated the horse from the thorn.

The most beautiful hands are made by sacrifice and efforts I believe. Even the hands are rough, they are more valuable than any other.

I grown up in the Nature and graduated from the horticultural school keeping the beauties of nature. Since 1997 I've owned my own shop "Jang Flower Shop" and been running Florist training Academy. I won the 2nd at Korea Cup Flower Design Competition 2000. Since then I participated in Asia Cup in China, 2006 as a representative after won the 1st at the elimination competition. I try my best to show my unique design whenever I've been invited from home and foreign, and really enjoy it. If people could be happy and pleased to see the flowers, I'll make them happy at the sacrifice of myself. Also I always remind students to have such a spirit of self-sacrifice.

I'll show all about myself at the competition.
